Health Service of the Canadian Medical Association

DOES YOUR CHILD SEE?

When a child is blind in both eyes, the condition, of course, is recognized. Then, however children who have defective sight, which fact is unknown to their parents. That this is so, is evidenced every year by the number of children who are blind, who are found by school physicians to have defective eyesight.

The good work of the health service does not provide for the professional child, or for the child who attends a school where there is no health physician or nurse.

A child should be able to recognize a picture or object one-half as large as at twenty feet. Each eye is tested separately, one eye being covered with a card during the test of the other. For every vision a picture book may be used if there is any appreciable defect in either eye, for light or distant vision, the family physician should be consulted.

Cross-eyes is a condition which is frequently neglected because of ignorance as to its significance for children. Only this condition should be picked under medical care without delay. A cross-eyed condition and as the doctor himself to pay attention only to the lungs that come back through the straight eye. This means in one eye's being developed through use and the other's becoming useless because it is not used.

During the condition is properly treated early, the child loses the use of one eye and is actually blind in that eye. If the child is treated between two and three years of age, the most, or all of his vision can be saved; the longer treatment is delayed, the more vision is lost. Cross-eyes is a condition which does not correct itself. Children do not grow out of it. The child is placed under the parental, an eye's length away, with one eye covered by the parent's hand, and is made to look at the parent's nose with the uncovered eye, the parent will find that, on uncovering the other eye, it is either looking at the nose which means that no cross-eyes is present, or that it moved to no eye, or remained crossed. The parent should be an evidence that cross-eyes is present.

Your children will appreciate, in later years, your care of this special organ.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

HAND HILLS ECHOES

Mr. A. Anderson, of Fish Lake, had a vision of a child when a lot of horses landed in a hay rake run away, hitting and dragging her a short distance. She is now progressing favorably.

Mr. George Venns and son Edgar are home on a visit from Delhi, Ontario, owing to the serious of Mr. Venns' father, E. L. Venns, who was taken ill last a few days ago to take up his last days at teacher once more on Youngstown.

Mr. F. Nelson has been ill with the "flu" for the past two weeks, but is now recovering.

Sentinel Hill Items

Mr. David of Farnley Lake Mission, conducted service in the school on Sunday afternoon.

Miss Kathleen Newman returned to Youngstown to take up her teaching duties for another year.

Craigmyle News

School re-opened here on 27th ult., with the same staff who have been on duty for several years. John McLean, Principal; Mrs. Kate Lyons, in charge of the intermediate room; and Miss Mary E. Borked in charge of the Primary room.

Alex. Bain, who recently disposed of his Delia farm, has moved to Delia to stay. He has been in the city for some time, and has purchased the half section formerly owned by Simon Gotsch, who now lives on the opposite side of the road, having traded half section with his brother Ferdinand Gotsch when the late-named purchased H. A. Locke's farm.

Mr. and Mrs. Cavanagh and two children have returned home after spending a month on the Pacific coast.

Goat, and going as far south as Los Angeles, and on to Tin Juan, in Mexico.

A new open loading track is being constructed on the north side of the station grounds.

Ben R. W. and Mrs. Griffith returned home at the end of the last week from Edmonton, after attending "The School of Religion," which was held there during the last part of August.

Mr. and Mrs. C. Bell, with their daughter Hester, and Mary Gelsinger, went to Calgary by car on Monday, where Hester and Mary are going to take Grade X at Crescut Heights High School.

G. H. Ron has returned from a ten-day trip to the Peace River district, and reports the harvesting operations there to be ahead of here.

FAREWELL

On Thursday evening last, the teachers and officers of the Delia United Sunday School assembled at the home of Mr. and Mrs. A. Morrison. The evening took the form of a farewell to Miss Mary Morrison, who has been an active worker on the Sunday School since its opening two years. Before leaving, in a few well chosen words, outlined the valuable service rendered by her every session to her new activities. Miss Katherine Meyers then presented her with a framed letter from the school, and a small gift. The evening was brought to a successful close by the serving of lunch by the ladies present.

8th Monthly Crop Report

(Issued by Department of Agriculture, Government of Alberta.)

Edmonton, Sept. 6, 1928.

Brown weather during the first two weeks in August retarded the ripening of crops and delayed harvesting a few days. The warm weather of the past two days, however, has been beneficial in drying the grain for cutting, and in ripening the late grain, and setting in now general over the entire province. The Peace River country reports 75 per cent of cutting done and something is expected to be general by next week. Central and southern parts of the province report 25 to 30 per cent of cutting done. Very little threshing has been done in the province to date, and no estimate can be made at this present time of the yield of the different crops. We do not anticipate, however, and increase in total yield of wheat over that of 1927. The quality of the grain being harvested throughout the province is good.

Fruits have occurred in almost all parts of the province but there have been continued small areas and the average percentage of damage from frost for the province to date, and no estimate can be made at this present time of the yield of the different crops. We do not anticipate, however, and increase in total yield of wheat over that of 1927. The quality of the grain being harvested throughout the province is good.

The average owing to the dry weather at this season will be less than last year. The province is estimated to have received monthly 10 per cent of the normal average or against 17 per cent last year. The average for the province is estimated to have received monthly 10 per cent of the normal average or against 17 per cent last year. The province is estimated to have received monthly 10 per cent of the normal average or against 17 per cent last year.

Casein Made From Skimmed Milk Can Be Profitably Used For Manufacture Of Many Articles

The products of Canada's dairy factories include besides butter, cheese, cream, evaporated and condensed milk, milk powder, and other items, an enormous quantity of skimmed milk, which is not only a waste, but also a liability. It is estimated that in the United States last year alone over 257,000 tons of skimmed milk were produced, and in Canada the quantity was not far behind. It is estimated that in the United States last year alone over 257,000 tons of skimmed milk were produced, and in Canada the quantity was not far behind. It is estimated that in the United States last year alone over 257,000 tons of skimmed milk were produced, and in Canada the quantity was not far behind.

The Balance Of Nature

Flowers Emerge For Pollination On Vast Scale
An important feature of the balance of nature is involved in the fact that most flowers are dependent for pollination on the visits of appropriate insects. If certain insects fail to visit a flower, the crop of seeds fails, or they keep their reproduction to the next year. This is a delicate balance, and it is one of the most delicate of all.

Difficult Mountain Climbing

East Ascent For This Season Not Best Made Of Mount Everest
What will probably be the last ascent of the famous peak of Mount Everest this season. The mountain has been so high that it has just been accomplished by a party of four, led by George Finch, of the United States, and two British, Mr. Mallory, of Chicago, and Messrs. Tenzing and Norgay, of the Himalayas. The ascent was made on the north-east face, and was a most difficult one.

Wheat Flour In Canada

Favorable Conditions Make It Great For Use In U.S.
If there is a profit in growing wheat in the United States, it is in Canada. The wheat crop in Canada is the largest in the world, and it is the most profitable. It is estimated that in the United States last year alone over 257,000 tons of skimmed milk were produced, and in Canada the quantity was not far behind.

Winnipeg Newspaper Union
